

AKVA®

MODERN WATERBEDS

🇩🇰 Made in Denmark

Water embraces us with deep calm, carrying our bodies as nature intended. From the womb of our mothers to the inner of our beds, water has created the foundation of human sleep.

AKVA was founded in 1981 by Lars Brunsø. From the beginning the company has bridged old and new by creating beds, combining new production knowledge with the most elementary material, water.

Through a constant procedure of refining the technology behind waterbeds, AKVA is driven by the process of transferring the resting qualities of water to a modern furniture of highest sustainable quality.

ESTABLISHED 1981

The idea of sleep itself is very similar to the concept of sustainability. Both are processes with the purpose of recovery. However, while we for many years, only have spoken about human sleep, we more than ever need to pay attention to the importance of a well-rested environment.

THE IDEA OF SLEEP

4

Since 1986 all our products have been made at our own factory in the middle of the Danish Lake Highlands. Year by year the facilities have developed to become, high tech- and specialized production of waterbeds. Every part from frame, cover and finally the mattress itself are manufactured by our skilled craftsmen and women. This way we can promise you a furniture of highest quality.

THE FACTORY

Sleep

We believe in the necessity of broadening the understanding of beds. Rather than a pure ergonomic furniture, we think of a bed as a holistic plateau of rest – A sanctuary of calmness, one that simultaneously should aim for the relieve of body and mind.

Naturalness

We believe in the natural qualities of each material that we use. From the calming effects of water to the aesthetics and durability of wood and textiles our work is an exploration of unpolished materiality.

PHILOSOPHY

Sustainability

We do not believe in the idea of giving rest to humans on behalf of a burdened environment. For this reason, we feel much responsible for the imprint that we leave when manufacturing beds and so we strive each day to optimize the sustainability of materiality, transport and quality.

The AKVA bed is a component system and can achieve a very long life cycle through professional maintenance and suitable spare parts that are also manufactured in the future.

Craftsmanship

The purpose of our craftsmanship is to create beds that last. We think of the bed as a furniture to follow you for many years. For this reason, we emphasize the importance of longevity and so we have developed our collection from this principle. By focusing on quality materials, Danish production and modern technology, we do not compromise ourselves in creating the best possible sleep.

Discover our waterbeds collection. Each model is designed with your comfort and well-being in mind. We believe that a good night's sleep is the foundation of a healthy and fulfilling life, and that's why we put our heart and soul into creating the perfect sleep environment.

A good night's sleep

The unique pressure relief and the warmth of the waterbed contribute to helping you achieve a deep and uninterrupted sleep, and they are two of the essential differences between waterbeds and traditional beds.

QUALITIES

Unique pressure relief

The water mattress always adapts to your body, which prevents pressure points, and it supports you in any position. A waterbed always provides optimal body support, which is why we call it the best sleep in the world. The water mattress never changes its shape but provides the same comfort year after year.

Tempered warmth

A waterbed has a comfortable temperature all year. The warmth makes you relax, and it makes you fall asleep faster during the winter, because you don't have to use energy of warming up the bed first. The waterbed never gets too warm during summer because the temperature is adjusted with a thermostat.

10

Per Weiss

Inspired by the Scandinavian design tradition, the Danish furniture designer is driven towards a contemporary aesthetic functionalism.

Timeless aesthetic quality

Vega is characterized by its modern combination of textile and chrome, Vega is a pure AKVA classic, designed by the danish furniture designer Per Weiss.

The bed is available with or without lamps and you can complete the Vega look with matching pouffes.

kvadrat

Vega Re-wool®

Crafted using 45% recycled wool, the textile Re-wool from danish Kvadrat can be chosen exclusively for Vega. The textile is partly made by reusing scraps from Kvadrat's yarn spinners in the UK. It is characterized by a calming aesthetic, where stitchings on a darker background creates a shimmering depth. Choose between 7 colors of Re-wool or our other standard colors.

VEGA

A masterful blend of wood and fabric

With a bed frame that seamlessly integrates into the elegant overall aesthetic, Carla transcends the classic boundaries of waterbed design in a truly stylish manner.

The upholstered frame, elegantly carried on a light wooden construction, The cushioned frame, gracefully supported by a delicate wooden structure, conveys not only a contemporary design but also an essence of lightness and organic expression.

CARLA

14

Lightness and sophistication

A luxurious waterbed that combines uncompromising comfort with a sleek Nordic design.

With its elegant legs in solid oak, Nordic Select adds a touch of lightness and sophistication to any bedroom. Crafted with the highest quality materials and expert craftsmanship, Nordic Select is designed to provide you with restful sleep for years to come.

NORDIC SELECT

Practical and aesthetic

Choose a bed base with drawers to storage your bedding, clothes etc. Nordic Select can be specially made with upholstered drawers that are optically hidden due to the upholstered front. When choosing a nightstand, we can reduce the length of the drawers.

17

Refined and sophisticated

This elegant sleep solution features a frame that partially conceals the base, adding a touch of class to your bedroom.

Select the upholstered frame from our Athina fabric collection or textile leather to craft a sleeping environment that impeccably aligns with your personal taste.

MODULEX SELECT

18

Convenience of spacious storage

True to AKVA's values, the Modulex Select is crafted with sustainability and craftsmanship in mind, ensuring a high-quality, eco-conscious product. Combine the bed with a functional solution of spacious storage.

Modern design and unmatched comfort

BoxBed is an upholstered waterbed of simple elegance. Inspired by a modern box spring look, the bed is characterized by the increased visibility of the mattress, which together with the frame creates a calming combination of aesthetic balance. Embrace the AKVA BoxBed for a truly indulgent and rejuvenating slumber that unites comfort, design, and responsible luxury.

BoxBed combines the timeless appeal of a traditional box spring bed with the unparalleled relaxation of a water mattress.

BOXBED

21

22

Classic design evolves

Nordic has been a timeless classic known for its simplicity and elegance. The design is characterized by the combination of a visible bed-base and a discrete frame. By launching the veneered frame option, you can either chose a uniform expression or explore the more dynamic combination of wood and upholstery. Nordic is designed to fit our collection of headboards.

Design principles of simplicity and natural elegance.

Inspired by the principles of simplicity and sustainability, Nordic captures the essence of Scandinavian design, making it an ideal centerpiece for any modern bedroom.

NORDIC

24

True master of transformation

Modulex is the pinnacle of adaptability and modern design. It is a true master of transformation, effortlessly blending into any bedroom aesthetic.

Featuring a striking frame, Modulex is available in various upholstered, decor, and veneer options, ensuring a perfect fit for your personal style. Explore the Modulex waterbed and experience the unparalleled flexibility and luxurious comfort that come with our most adaptable creation.

MODULEX

Individually tailored to your preferences

AKVA Soft provides the opportunity to create a sleep sanctuary tailored to your unique design preferences and style. Soft can be built into any existing bed frame or can be used freestanding with all headboards and bases.

27

SOFT

The essence of pure design

Lyra offers the unmatched experience of a genuine waterbed, meeting and exceeding your expectations for restful sleep.

Lyra is modern reinterpretation of the classic hardside waterbed. Unlike most of our waterbeds Lyra is constructed without foam which makes the bed appear with a less visible mattress thus emphasizing the style of the bedframe itself.

LYRA

209

Epitome of timeless elegance

Nori is a modern Nordic waterbed designed by Oliver & Lukas WeissKrogh. Inspired by the serene Danish landscape, the design is characterized by tactile qualities, merging the organic texture of upholstery with unpolished beauty of solid wood.

NORI

Oliver and Lukas WeissKrogh are two brothers educated within the field of industrial design. Studio WeissKrogh is inspired by Scandinavian minimalism, designing thoughtful, and environmentally friendly products that will make a difference for the end user.

CONSTRUCTION OF A WATERBED

We only use phthalate-free premium vinyl laminated from two layers. This makes the core of our waterbeds not only extremely durable and resistant, but also maximally environmentally friendly.

LANXESS
Energizing Chemistry

X Mesamoll®

THE AKVA MATTRESS

Uno or Dual?

Two water mattresses in your bed allow you and your partner different levels of stabilization, optional lumbar support and different temperature settings. A divider between the water mattresses discontinues the movement of the water and ensures an undisturbed sleep.

Uno

Dual

38

Stabilization Systems

At the heart of our waterbeds lies the ability to customize the level of stabilization, allowing you to tailor your bed to your specific needs and preferences.

Fleece stabilization

Free-floating polyester fiber inserts are precisely tailored to the shape and size of the water mattress. This ensures a long-lasting and stable water mattress.

Lumbar support with fleece stabilization

Optional for F3/F4/F5/F6/F7

ERGO stabilization

Our ERGO stabilization systems, crafted from open-pore special foam, offer robust stabilization and quick response to movements on the water mattress.

Fleece ERGO stabilization

Our F-ERGO stabilization systems blend ERGO foam with fleece, offering ergonomic support and superior pressure relief from both Fleece and ERGO systems.

Low Energy Topper

Our comfortable Low Energy Topper is available as an option for new beds or retrofitted to complement an existing bed. It is attached between the cover top and bottom with zippers and consists of a closed cover pocket made of breathable 3D mesh spacer fabric and a 4 cm cold foam panel made of EUCAFEEL® foam. The foam is pressure relieving, elastic and climate regulating. Another advantage is the high insulation and the associated energy savings.

Comfort Topper

If you prefer a firmer lying feeling with additional padding of the cover, the Comfort Top is the right choice.

Swing

Salsa

Flamenco

Boogie

Covers

Four different covers are available for your water mattress. All are washable and divisible with center zipper from widths of 150 cm and above.

COVERS

Safety liner

Our handmade safety liner is attached to the cover with zippers and are made of the same vinyl as our mattresses.

Protect

The washable protective layer is attached to the existing cover of your waterbed with the zippers and facilitates care and cleaning.

Warmth to feel good

- highest energy efficiency with Internal electronic fuse
- clock, alarm clock and automatic reminder for conditioner refill
- intuitive operation with child safety lock
- a biological compatibility certified by VDE-EMC
- VDE-GS tested safety at the highest quality level

46

There is something calming about the sound of rain. Something that leads us back to a place of belonging. The Water, from where life began more than 3 billion years ago. In which we slept in the womb of our mothers, until we rose, and wandered through history.

A landscape of time, which brought changes with it – an emerging knowledge, dreams and the creation of something beautiful. A landscape of opportunities, where the answer yet sometimes was to be found in that, which already existed.

For in a world that is constantly changing, we often long for the things that last. A place to return.

The quiet. The water. The sleep.

THE SOUND OF RAIN

The core of our products is water. This pure material, whose supportive properties as an unchanging medium extends the limit for a long-lasting bed and provides unparalleled comfort.

Every AKVA bed is made in our factory in Denmark. Our made-to-order philosophy means that if a product is not needed, it is simply not made. This is environmentally friendly and makes each of our beds a very individual piece of bedroom furniture, made just for you.
